

NotifyMe User Manual

Welcome to NotifyMe! This guide will help you understand how to use your QR tags, manage subscriptions, and use the communication features securely.

1. Getting Started

When you receive your NotifyMe QR tag, scan it to register it to your account. You can give it a specific name like "My Car" or "My Keys".

2. How Scanning Works

When someone finds your item, they simply scan the QR code. They will be taken to a secure web portal where they can contact you anonymously. Your personal phone number and email are never revealed to the scanner.

3. Communication Features

- Secure Messaging: Scanners can send you text messages instantly.
- Image Sharing: Scanners can upload pictures of the item they found.
- VoIP Calling (Premium): If you are a Premium member, scanners can place direct internet calls to your NotifyMe app, exactly like a WhatsApp call.

4. Subscriptions & Premium

The Free tier allows up to 2 active QR tags with basic messaging. Upgrading to Premium (\$12/month) unlocks VoIP internet calling, advanced analytics, and priority support.

5. Support

If you have any issues, use the "Contact Customer Care" button in the Support Center of your Owner Admin Portal.
